

Driver App

THE ALL-IN-ONE APP FOR STREAMLINED DELIVERIES

The Driver App is a powerful mobile application designed to empower drivers and optimize deliveries across all industries. This app seamlessly connects you with shippers, carriers, and customers, ensuring a smooth and efficient delivery experience.

Deliver Faster and Smarter with the Driver App

Effortless Delivery Management

- See all your assigned shipments (freight orders) in one place.
- Get clear instructions and directions for each delivery.
- Interact directly with the company for any questions or clarifications.

Optimize Your Routes

- Enjoy real-time route optimization based on your current location.
- Navigate with ease using integrated maps and turn-by-turn directions.
- Save time and fuel with the most efficient routes.

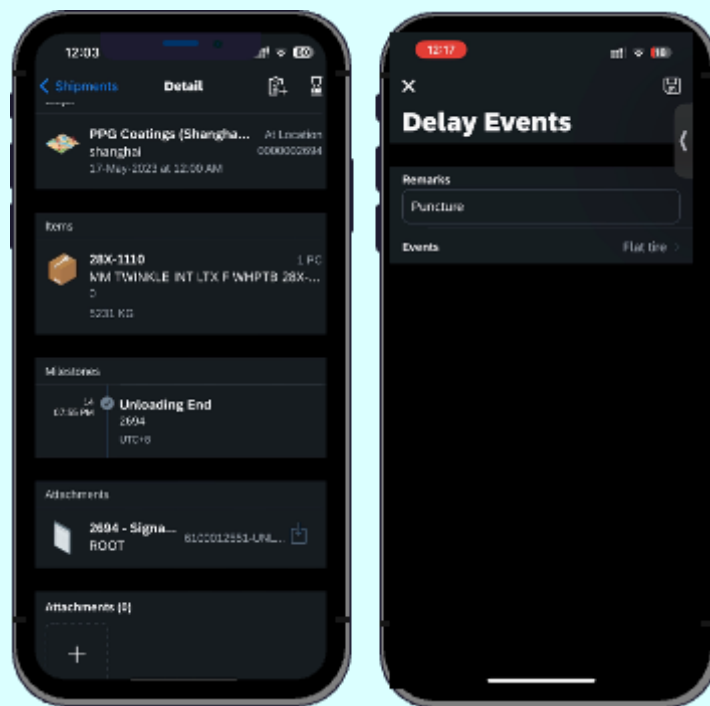

Stay Connected, Even Offline

- Report departures, arrivals, and delays with ease, even without internet access.
- Pre-configured delay reasons like traffic or breakdowns for quick reporting.
- Changes made offline automatically sync back to SAP-TM when you regain signal.

Optimize Your Routes

- The app automatically adjusts to your device's language for a familiar experience.
- Deliver seamlessly across diverse regions and languages.
